“The Telluride” Beauty, Functionality and Ruggedness All in One Garbage Can Enclosure.

Attractive Colors

Our Telluride metal enclosures offer an aesthetically pleasing waste management solution that looks great. With ten colors to choose from it's easy to find a color combination to fit in almost any environment.

Functional Design

Not only do our Telluride enclosures look great but they are a perfect waste management solution. Available in single and double can models that feature a paddle latch design, make loading and unloading easy for people, while preventing bears from getting in. Top lid lifts easily for throwing out your trash, while doors provide easy access for waste collection personnel. Telluride enclosures are built in the U.S. and are ADA compliant.

Rugged Construction

While Telluride enclosures look great and are easy to use, they are also bearproof. These rugged trash can enclosures are constructed of heavy duty steel, with our paddle latch design that has been proven and tested with grizzly bears by the Living With Wildlife Foundation (LWWF).
